

The Bow Valley Call

Devoted to the Up-Building of Gleichen and the Development of the District Generally

Year VI., No. 15

GLEICHEN, ALBERTA, THURSDAY, JULY 3, 1913

Per Year \$1.50

FARMERS' ELEVATOR

On Saturday last, June 28th, notwithstanding the bad roads, a well attended meeting of the Gleichen Farmers' Union was held in the Sample Rooms of the Palace Hotel to finally close up the allotment of stock for the building and operating the Farmers' Elevator under the Provincial Government Elevator Act. At the opening of the meeting it was shown that there were plenty of applications in hand to take up all the stock offered, but unfortunately a number had neglected to accompany their applications with the necessary cash they had subscribed for. However, in a short time a number came forward and subscribed sufficient to make up the amount, with the understanding that those who delayed may have the opportunity of securing their shares on application to the secretary and obtain all the advantages of co-operative buying by applying to the secretary.

It was, however, explained that the elevator will be operated in the interests of the farmer whether he be a shareholder or not.

After the list of stockholders was completed nominations were called for by Chairman N. N. Hays for five Directors when eight names were put forward, and on a ballot being taken the following were elected: N. N. Hays, W. D. Trego, J. C. Buckley, N. W. McMillan, and H. W. Lee.

Nominations were then called for three delegates to attend the Central Board of the Alberta Farmers' Co-operative Elevator Co., who are preparing plans and specifications for the scheme. It was originally intended to start with twenty, but the response was so universal that the Central Board were obliged to increase their estimate to thirty. The delegates elected were: N. N. Hays, W. D. Trego, and J. C. Buckley. There was an application for Manager before the meeting, which was ordered to be filed for consideration when the proper time arrives. After other routine business was disposed of the meeting adjourned.

F. E. Kennedy Dies Very Suddenly

The announcement of the death of Fred E. Kennedy on Saturday evening came as a great shock to all who knew him. He had not been well for a month previous, but from all reports was speedily recovering and was able to move about. Saturday afternoon, about four o'clock, he enjoyed some oysters, and at 6.35 ate a hearty supper, after which he retired to his bed room with his wife and talked cheerfully of accompanying her to the Calgary Exhibition on Monday. Then he became quiet, and failing to answer her questions she became alarmed and finally phoned for Dr. Rose, who, upon arriving, saw he was in a serious condition. Phoned Dr. Ferguson to come to his assistance, but before he reached the residence he had passed away, the cause being attributed to heart failure.

The deceased leaves a bride of only four months, a widowed mother, near Hamilton, Ontario, and a brother Robert, of Calgary, who is also well known in and around Gleichen, to mourn his demise.

A telegram was at once sent to his brother, but failed to reach him. However, he arrived on the night train for the purpose of visiting the

deceased over Sunday, and when he stepped off the train and was informed of the facts it was indeed hard for him to realize the situation.

The remains were embalmed and shipped to Calgary Sunday night for interment.

The deceased was about 38 years of age and had been in business in Gleichen for the past three years as manager of the Massey-Harris Implement Agency, and also transacted considerable business in horses. He was considered one of Gleichen's most energetic business men and will be a distinct loss to the town and district.

To his relatives the deepest sympathy of the entire community is extended, especially to his young widow, who holds the respect and esteem of all, having lived for a number of years previous to her marriage with her parents on their farm at Queenstown.

Town Council

John Hanson is here from Vonda, Sask, and has purchased a carload of horses from Jack Morton and will ship them east in a day or two.

The minutes of the Gleichen Town Council for Friday evening last are not very lengthy, yet contain one item of much interest to the ratepayers in that the tax rate for this year was set at 28 mills on land values and 10 per cent. is to be charged—all businesses on a rental basis. Unfortunately the CALL reporter was unable to attend the meeting, and, therefore cannot give a report of the debates the worthy councillors indulged in.

According to the minutes Mayor Bray was in the chair, with Councillors Service, Leggat, McKay, and Larkin present.

The minutes of the meeting held on June 13th and the special of June 23rd were as usual adopted as read.

The secretary was instructed to inform Dr. Hughes that the Council was not at present in a position to engage an inspector of meat.

Ald. Leggat moved the passing of the accounts of A. Whiteley for \$11.35 and L. Simonin for \$41.50 as passed by the finance committee, but it was deemed wise to hold over H. M. Wennich's account for further information.

Ald. Larkin and Service carried unanimously "That the rate of 28 mills be enforced for 1913 on land values and 10 per cent. on business assessment (rental basis)."

Ald. Leggat and Larkin successfully moved that a rebate of 5 per cent. be allowed on all taxes paid before September 1st, 1913, and Ald. Service and Leggat moved adjournment.

Don't forget the Queenstown Farmers' Union picnic and dance on Friday, July 11th. A good time is assured.

Still the farmers are hauling last year's grain into the Gleichen elevators. They are endeavoring to get it all in before this year's will require their granaries.

Dipping at the Queenstown vat is to start on July 7th at the Circle Farm.

The Oklahoma Ranch Wild West Show Co., has written the CALL that their circus will not visit Gleichen this year as they have changed the route of their tour entirely.

The Gleichen Public school finally closed on Monday for the summer holidays, and the boys and girls are now thoroughly enjoying the vacation.

List of Pupils in The Gleichen Public School Who are Promoted

Grade IV to V—Dennis Ramsbottom, Jean Walker.

Grade III to IV—Herbert Nield, Walter Laycock, John Orlecky, Violet Munson, Charlie Plant, Henry Trend, Arthur Whiteley, Edwin Service, Donald Burr, Lewis Bartsch, Rachel Koefed, Nora Cosgrave, Joseph Riley, Frank Bates.

Grade II to III—Beatrice Buckley, Roy Wishart, Marjory Pollett, Etta Long, Mable Bragg, Ellen Munson, Charlie Walker, Willie Aial. Promoted on trial—Eliza Wilson, Frankie Plant, Gertrude Nield.

Grade I to Grade II—Bertie James, Reggie Vigar, Jack Marshall, Margret Spurr, Baptiste Aial, Greta Remington, Donald, Lafferty, Bella Wilson.

Class Three to Four—Theodore Bartsch, Irwin Young, Dorothy Wilson, Richard Cosgrove, Walter McKay, Dorothy Higgins, Earl Bragg, Willie Taylor, Willie Graves, Edith Millie.

Class Two to Three—Geneva Spurr, Barney Wilson, James Wright, Lewa Allgood, Howard Farr, Kathleen Nield, Lucy Morton, Norman Prestwich, Harold Prestwich.

Class One to Two—Ada Whitely, Audrey Leggat, Jean MacLean, Marjory Long, Annie Weddle, Mildred Naylor, Thomas Naylor, Gordon Dadds, Marvel Follett, Muriel Taylor, Lucille Monson, Gladys Hughes.

Dominion Day at Hammer Hill

The Namaka Farmers' Union picnic at Hammer Hill on Dominion Day proved most successful with Sec. Lawrie in charge. A delightful luncheon was served at 12 o'clock, and the afternoon was spent in sports and a base ball match. The sports as telephoned the CALL resulted:

Girls' race, under 10, Margrett Sims, 1st and Tibi Lawrie, 2nd.

Girls' race, under 6, Ray Baker, 1st and Irene McBean, 2nd.

Girls, under 14, May Watson, 1st and Hazel Sims, 2nd.

Boys, under 10, Harry Baker, 1st and Francis Winspear, 2nd.

Boys, under 14, Willie Lawrie, 1st and Allen Winspear, 2nd.

100 yard dash, open, Geo. Bell, 1st and J. McBean, 2nd.

Three-legged race, A. H. McPhee and Geo. Bell, 1st; C. Bentz and W. Colpoys taking the booby prize.

Ladies' egg and spoon race, Miss Allen, 1st, and Mrs. Thorsen, 2nd.

Ladies' potatoe race, Mrs. Thorsen 1st, and Mrs. Kemell booby prize.

The base ball match was a splendid one, resulting in a tie of 6 to 6 between the Hammer Hill Twirlers and the Namaka Giants.

Baseball at Big Cut

The closest baseball game of the season was played between Gleichen and Blind Creek at the S. A. L. Co.'s Big Cut, when a score of 3 to 2 was made in Gleichen's favor, before a crowd of about 75 people. It was a fast game all through and nine innings were played, excepting that Gleichen being ahead relinquished the last half of the ninth. The line up of the Blind

Creek team was: Henry C, Mace 1st Carson 3rd, Sproule s.s., Brown cf, Watts lf, Creal rf, Baker 2nd and Benton p. The two who scored were Henry in the third innings and Benton in the seventh.

The Gleichen line up was J. McArthur p, Cairnes s.s., Wade 1st, B. McArthur c, Jordan 3rd, Demerest cf, Moulton rf, Scott lf, and Service 2nd. In the fourth innings Jordan scored and in the eighth Cairnes and B. McArthur won the game.

We regret that this issue we have not the time to give a full report of the game. However, the Gleichen team and their friends who accompanied them are most desirous to state that they appreciate the manner in which the Blind Creek boys entertained them and especially wish to express their appreciation of the generous hospitality of Mr. and Mrs. Mace in giving them a chicken dinner. The CALL reporter hopes next issue to report more fully on the crops, etc., seen on the journey.

Take a Lesson From the Hen

Mr. Merchant, take a lesson From the ordinary hen: How she loudly advertises Her great usefulness to men.

Lays an egg, then tells about it— Lets the world know what she's done She's not like the lazy rooster, Crowing at the rising sun.

When you've done a thing that's worthy When you've got something to sell Why, just emulate Old Dorking, Advertise, and do it well.

The tide of immigration from the United States into Canada is causing serious disquiet to our southern neighbors. Whitfordsville, a prosperous town thirty miles west of Boston, is being rapidly deserted. Recently three hundred French Canadians, former residents of the province of Quebec, left for Edmonton, Alta. Later this summer another contingent will also leave. Many are giving up paying positions in the mills in towns near Whitfordsville. Families are being broken up in many cases, and the station presents a sorry sight. The immigration to Canada from this and other New England towns is becoming alarming to local business people, and an effort will be made to induce the French Canadian residents to stay. The Canadian government is working actively through agents all over New England to induce the Canadian-born people to return to their native country.

Miss Convey left on Monday to join relatives at Lacombe, where she will make her home in future. She has been a resident of Gleichen for the past five years and having always taken an active part in the Methodist church will be missed by many friends, who express their kindest wishes for her good.

NOTICE TO CREDITORS

In the estate of John Robert Ansell, laborer, late of the Village of Gleichen, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the late John Robert Ansell, who died on the 4th day of May, A.D. 1913, are required to send to the Trusts and Guarantee Company, Limited, on or before the 15th day of July, 1913, a full statement of their claims and of any securities held by them, duly verified, and that after that date the said company will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed with the said Trusts and Guarantee Company, Limited, the executors of the said estate.

Dated at Calgary, this 21st day of June, A.D., 1913.

YES, WINDSOR SALT is the best TABLE SALT.
"Here's a salt that won't cake," WINDSOR TABLE SALT.
"No Ma'am, there's nothing in it but salt—just pure clean, wholesome salt—and all salt."

Everybody around here uses Windsor Salt, and I don't believe this store could sell any other kind of Table Salt.

"No Ma'am, we wouldn't want to handle any other salt—we like to sell Windsor Salt because we know it will please our customers."

WINDSOR TABLE SALT

More Ancient.

They say that chess is the oldest game, remarked on Old Foggy.

Poker is older than chess, said the Wise Guy.

How do you know? asked the Old Foggy.

Didn't Noah draw to pairs on the ark and get a full house? replied the Wise Guy.

Eddy, little Bobby's playmate, was asked by a motion picture company to pose for it. Later, when the picture was produced, Bobby went to see him.

Eddy played a thrilling roll of escaping from the pantry with a glass of jam just before his aunt went in search of him.

Bobby sat through the show, eyeing his playmate a little jealously, and then every day that week found Bobby spending his nickel for a front seat.

The manager of the show, becoming curious, asked the reason, and Bobby replied:

Some day that woman's gonna ketch 'im, an' I wanna see the fun.

Thousands of mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Naturally

Prosperity has ruined many a man, remarked the moraliser.

Well, rejoined the demoraliser, if I was going to be ruined at all, I'd prefer prosperity to do it.

The Careless Gardener

I should have planted more potatoes. Why?

There ain't going to be half enough to accommodate the potato bugs.

No, sir-ee, said Uncle Sheepskin, you don't ketch me takin' a fast train right threw tew Chicago. I kin dew without most anything else on the keers except eatin'.

Motor omnibuses in which a gasoline engine operates a dynamo to provide the motive power are proving successful in London and Liverpool.

Preserving Fence Posts From Decay

Wood-rot, in all its forms, is due to the action of fungi working under suitable air and moisture conditions. In fence posts these conditions are most favorable at or near the surface of the ground and hence it is there that decay first starts. Some woods, like the cedar and tamarack, are more resistant to fungus attack and may last, as fence posts, from eight to ten years. Unfortunately, however, the supply of these woods has grown very scarce and the farmer is faced with the alternative of importing durable material at a high price or of applying preservatives to the common non-durable woods which grow in his own wood lot. As the latter alternative is not only cheaper, but also much more effective, it is of considerable economic interest to the farmer to know how these wood-preservatives are applied.

Creosote, a dead oil of coal tar, is perhaps the best preservative for this purpose, as it does not dissolve out of the treated wood, when in contact with moist earth. It costs from eight to fifteen cents per gallon.

There are two methods of applying the creosote but before either method can be applied it is necessary to have the posts well seasoned if the best results are desired. This seasoning is best accomplished by peeling the bark from the posts and then stacking them in loose piles in the open air for several months, so the amount of water in the wood may be reduced to the smallest per cent. possible.

The Brush Method consists in applying the creosote like a coat of paint to the lower portion of the post, up to a point six inches above the ground line, the creosote being first heated to one hundred and eighty degrees Fahrenheit. Two or more coats may be applied time being allowed between each application for the creosote to soak into the wood.

What is known as the Open Tank Method, while more expensive, secures deeper penetration and gives better results especially when the posts are split or checked. The creosote is heated to boiling point in a metal tank and if such is not available, a simple and effective apparatus can be made by boring two holes, about two feet apart, in the lower half of one of the staves of a water-tight barrel and screwing into these holes two pieces of iron piping three to four feet long which are connected by a shorter vertical pipe with two elbow-joints, thus forming a complete circuit somewhat resembling the handle of a mug.

The barrel is then filled with enough creosote to cover both upper and lower pipe holes and a fire is kindled under the lower horizontal pipe which heats the creosote in the pipes and creates a circulation which continues until all the creosote with the barrel is at boiling-point. The posts are then placed in this boiling liquid for about five hours after which they are immediately transferred to another barrel of creosote, or else the fire is put out and they are allowed to remain in the tank until the creosote becomes thoroughly cooled.

In this process the preliminary heating drives some of the contained air out of each wood-pore, and when the posts are allowed to cool in the creosote, a partial vacuum is then created in each pore which draws the creosote into every fibre. Poplar posts, which ordinarily last but three to four years, after the above treatment will last twenty years and the same applies to all other tree species in Canada. All that is essential is thorough seasoning before treatment. Further information can be obtained on application to the Forestry Branch, Ottawa.

An Expensive Item

The manager of a certain music hall prided himself on his brilliant oratorical powers, and every Saturday night he announced the stars for the ensuing week.

One evening, after giving in glowing terms the smaller luminaries, he finished thus:

And last, but not least, we have secured at enormous expense, Spring Bros., the world's acrobats, the real champions, and the talk of the stage, for six nights only.

And after pausing for breath, he exclaimed: Yes, and what's more, ladies and gentlemen, on Monday week we have a troupe coming that can knock 'em into a cocked hat.

Chemists have some very queer applications for prescriptions. An old war veteran limped into a shop one day and said to the druggist:

I want some medicine. What kind of medicine?

Oh, I don't know. What do you recommend?

Where does the seat of your difficulty seem to be?

In my wooden leg, mister. It's gettin' to be worm-eaten.

Now, Jeannette, said the Sunday school teacher to a small student, can you tell me why God gave Moses the rod?

Yes, ma'am, replied Jeannette, so he could chastise the children of Israel if they didn't get their lessons.

Six-year-old Dick was preparing, much against his own sweet will, to go calling with his mother. It was the first time that Dick had been allowed to get himself ready alone, and together with boyish disgust at being obliged to go visiting, he felt the importance of the situation. After having put on his hat and coat he suddenly remembered something, and called downstairs: Mother, shall I wash my hands or wear gloves?

Left to Guess

First Broker—Did you win or lose in that big drop in stock?

Second Broker (loftily)—That is my business, sir. Say, can you direct me to a five-cent lunch counter?

Now Edgar, said the teacher to one of the members of the primary class in grammar, what is the plural of tomato?

Ketchup, was the prompt but unexpected reply.

Teacher—Johnnie, what was the most ferocious animal you saw in the circus parade?

Johnnie—The callopo.

ROSY CHEEKS STRONG NERVES

Should be the Birthright of Every Woman and Growing Girl.

Many women and growing girls who should have bright eyes, rosy cheeks, strong nerves and elastic step, and a good appetite, are seen to degenerate in health. Their spirits grow temper fitful, and the nerves oversensitive. They may have inherited a tendency to ill-health, or they may have over-worked, over studied or worried until the strength of the body was not equal to the demands made upon it.

To guard against a complete breakdown in health the blood must be kept pure and rich. No other medicine can do this so well as Dr. Williams' Pink Pills, for they act both on the blood and nerves, restore the appetite and keep every organ toned up. All women cannot rest when ever they should, but this strengthening medicine is within every woman's reach, and will keep them in the enjoyment of good health. And it is especially important that in every stage of woman's life the blood supply be kept pure and rich. The value of Dr. Williams' Pink Pills is well illustrated by the case of Mrs. David Chambers, Bensford, Ont., who says:

"Some years ago I suffered greatly from impoverished blood. I was very pale and thin and had no strength. I took a lot of doctor's medicine without getting any benefit, and at last decided to try Dr. Williams' Pink Pills, which I had heard highly recommended. It was not long before I began to feel better, and after taking the Pills for perhaps a couple of months my health was fully restored, and I have continued strong and healthy, and I think I owe it entirely to Dr. Williams' Pink Pills."

"Sometime later, my daughter, then about twelve years of age, had been working very hard at school and her health gave way. She was weak and listless and her hands and face were badly swollen, and we feared drowsy was setting in. However, we started to give her Dr. Williams' Pink Pills and she was soon quite well again. I always recommend Dr. Williams' Pink Pills to my suffering family as we did, knowing the benefit our family received from them."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by writing The Williams' Medicine Co., Brockville, Ont.

Plenty of It

But do you think your daughter would succeed on the stage? Has she enough of the artistic temperament?

Oh, yes, plenty of it. When she had to wipe the dishes on the maid's tray out last week she flew into a tantrum, and smashed the best salad dish we had in the house.

Fifty-five whales, yielding \$650,000 were killed in the North Pacific. But it is represented that if whales are decimated the millions of herrings that now stay close to the shores to escape the predatory big fish will venture into deep water, the salmon which live on them, will follow, and the salmon industry will be menaced, if not ruined. This is as bad a complication as any foreseen by manufacturing interests from tariff reduction and obviously points to the need of prohibitive tariff of some kind on whaling for the protection of salmon fishing.

I seem to remember that lady. Who is she?

She was my typist last year. She's charming. Why did she leave you?

She was too conscientious for me. One day I proposed marriage to her, and what do you think she did? She took all that I said down in shorthand and brought it, nicely typewritten, for me to sign.

At the Yarmouth Y.M.C.A. Boy's Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sun burn, an immediate relief for colic and toothache.

ALFRED STOKES,
General Secretary.

Another Swallow Wanted

A jarvey was driving with an English visitor on a bitterly cold day in December through the wilds of Connemara. They became quite sociable on the way, and the native, in a burst of confidence, pointed out a shebeen where the 'best potheen in Connemara' might be obtained. The Englishman only too glad to get an opportunity of warming himself offered refreshment, which offer was readily accepted.

"Tis a very cold day in these parts, Pat, observe the tourist.

"Tis, yer honor, replied Pat. He raised his glass, and the contents speedily vanished. And there's truth in the old sayin', he suggestively added, smacking his lips, one swallow never made a summer.

British Conservatism

An inquisitive member of the House of Commons was struck one day by the presence of a policeman in one of the lobbies. He wondered why this particular lobby should always have a guardian strolling up and down and made inquiries. The records of the House were searched and it was found that fifty years previously, when the lobby was being decorated, a policeman had been stationed there to keep members from soiling their clothes. The order never having been countermanded, the constable had kept his beat for half a century.

In Summer

Save where a fleet breeze bowed the wheat
And set it flowing like a river,
The steady beat of ardent heat
Kept all the air a-quiver.

The brooklet spent its merriment
While dancing down the caly meadow;
Where willows bent, it silent went,
All flecked with shine and shadow.

Amid the sky hawks drifted by,
And swallows darted, rising, falling
The cricket's cry rang shrill and high,
And quail kept calling, calling.

Grim Monarch Cane might rule elsewhere;
We watched the clouds go trailing over.
A placid, rare peace filled the air
And far-borne scent of clover.

Four-year-old Helen wished to get into the playroom, but the gate (which had been put at the door to keep her baby brother in) was locked. She tried again and again to climb over it, when at last her mother heard her say: Dear God, please help me get over this gate. Just then she tumbled over and said: Never mind, I got over myself.

A lawyer in court occupied the whole day with a speech which was anything but interesting to his auditors.

Some one—who had left the court room and returned again after an interval of some hours, finding the same harangue going on—said to the opposing lawyer: Is not H— taking up a great deal of time?

Time, was the answer; he has long ago exhausted time and encroached upon eternity.

Small Charlotte, not yet four years old, was gifted with so vivid an imagination that her mother began to be troubled by her fairy tales, and felt it time to talk seriously to her upon the beauties of truthfulness.

Not sure of the impression she had made, she closed with the warning that God could not fove a child who spoke untruthfully, and would not want her in heaven.

Charlotte considered a moment and then said:

Well, I've been to Chicago once and to the theatre twice, and I don't suppose I can expect to go everywhere.

Miller's Wom. Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for this purpose. They have proved their power in numerous cases and have given relief to thousands of children, who, but for the good offices of this superior compound would have continued weak and enfeebled.

The lesson in history was in progress, and in vain the teacher coaxed her class to answer. At last she brightened up. She had reached the star pupil of her class.

Now, Tommy, she said, Mary followed Edward V, and who followed Mary?

Yes, Tommy knew that, and his answer was swift. Her little lamb, teacher, he shouted triumphantly.

You can help a lot sometimes by not giving advice.

Dr. Morse's Indian Root Pills

are made according to a formula in use nearly a century ago among the Indians, and learned from them by Dr. Morse. Though repeated attempts have been made, by physicians and chemists, it has been found impossible to improve the formula or the pills. Dr. Morse's Indian Root Pills are a household remedy throughout the world for Constipation and all Kidney and Liver troubles. They act promptly and effectively, and

EDDY'S LATEST MATCH---

Safe---Silent
Non-Poisonous

---The new "Ses-qui"

Ask
Your
Dealer

The only matches of the kind in Canada.

The "tips" are positively harmless. You or your children can bite or swallow them without danger.

Sold in two sizes—regular and pocket. Protect yourself by using none but Eddy's new "Ses-qui"

Nice

Willie's Mamma—Is James a nice boy for you to play marbles with?

Willie—Sure, I can beat him every time.

The physician was giving good advice to the layman.

Don't let the little things pass unnoticed, said the doctor. It's these little things that often turn out to be serious if allowed to run on without attention. Even if you have a simple ailment, keep your eye on it.

But how can I, doctor? cried the patient. I have a boil on the back of my neck.

First Coster (outside picture dealer's window)—Who was this 'ere Nero, bill? Wasn't he the chap that was always cold?

Second Coster—No; that was Zero. Another bloke altogether.

You have never suffered from financial reverses? No, replied Mr. Dustin Stax. Finance is like dancing. When the market turns around and goes the other way you must reverse with it.

Customer—I want a novel good for summer reading.

Book Clerk—Here's just the thing. A detective story that will make your blood run cold.

Duck raising is the easiest and perhaps most successful branch of the poultry business, giving quick returns for the time and money expended. An experienced farmer states that ducks are the strongest and hardest of fowls hatched in incubators. Nearly every egg hatches. The young birds are vigorous and the old ones never have such troubles as roup or other parasitic diseases. Their oily feathers protect them from lice and they thrive on cheap food. For market purposes the Pekins are favored, but as egg layers the Indian Runners are unsurpassed.

Worldly Wealth

Some men do like to brag about their wealth.

What's the matter now? Barty stopped me yesterday to tell me proudly that he has hens in his back yard that are still laying eggs.

An Englishman who had been for a tour round the world was much annoyed with a report of his return which appeared in a local paper. This report ended:

His numerous friends are surprised that he is unchanged.

He did not know that the offender was the compositor, who, in getting up the report, had omitted a letter 'e', thus substituting the word unchanged, which the reporter had written.

They were enjoying a motor ride, and had just entered a country road.

May I kiss your hand? he asked a little confusedly.

She removed her veil.

No, she replied. I have my gloves on.

Playwright—I want a hat—size 8. Hatter—Mr. Penem, you always wear a 6.

Playwright—Sir, I know what I want; my comedy was a success last night.

FREE OF LUMBAGO

Because He Took GIN PILLS

Mr. H. A. Jukes of Winnipeg writes: "I have been a sufferer from Lumbago for some years past. I met your Mr. Hill and he advised me to take GIN PILLS. I have been taking them at intervals during the early part of the present winter, and up-to-date have had no return of my old trouble—in fact I feel better than I have for years, and think that my old enemy has vanished for good and all."

Concrete is the best building material

A BROAD statement—Yet literally true. The aim of man from the beginning has been to make his building materials as nearly like natural stone as possible. The great labor required to quarry stone led him to seek various manufactured substitutes. The only reason he ever used wood was that it was easiest to get and most convenient to use. Wood is no longer easy to get. Like most building material, its cost is increasing at an alarming rate. The cost of concrete is decreasing. So, from the standpoint of either service or economy, Concrete is the best building material. Canada's farmers are using more concrete, in proportion to their numbers, than the farmers of any other country. Why? Because they are being supplied with

Canada Cement —

Without this label it is not "Canada" Cement.
Write for our Free 160-page book "What The Farmer Can Do With Concrete"
—No farmer can afford to be without a copy.

Canada Cement Company Limited - Montreal

AN ODD CONCEIT.

The Sleeve Makes
the Smart Gown.

OF CHIEF DE CHINE AND BROCADE.

Blue crepe de chine makes this very pretty gown, combined with blue brocade silk patterned with a blurry design in American Beauty shades of red. The novel note of the costume is to be found in the long mousquetaire sleeves of the brocade silk. Touches of the same silk are introduced in a panel at the side of the skirt.

The model collar and surplice fichu are of cream colored net.

HEADACHE CURE.

Common Sense Living and Right Thinking Remedy For Most Ills.

There are two attitudes of the housewife to a headache. She makes it an excuse for shirking her duties, neglect of her house and general discomfort of her family, or she accepts it as inevitable and runs her house with needless pain and discomfort to herself.

There may be an occasional woman who must be a martyr to headache. The majority will find the pain curable if the cause be traced. Do not think "Another of my awful headaches!" and grit your teeth for bearing with what philosophy you can. Far more to the point is it to think, "Why should I have another?"

Most headaches can be cured by common sense living and ordinary care of the functions of the body. In treating a headache, first find out the cause.

If the housewife awakes with a headache each morning she may be short of ventilation in her room. Let no fear of draft or consideration of hangings or furniture lead her to sleep with closed windows. Nor should she think a window raised an inch or two meets fresh air needs.

Anemia causes headaches. If the blood is thin and the flow sluggish you are sure to be a martyr to your head. Plenty of exercise, especially in the open air, and a good blood tonic will soon work a cure. Women of sedentary life, who use their brains overmuch, are especially prone to this type of headache.

Overwork, overworry and fretting are prolific causes of headache, especially with the nervous, high strung woman who takes too much out of herself, then generally takes the rest out of her family. Cure? System, punctuality, learning to let things slide, more rest and sleep and an acquired philosophy.

Heel and Toe Protectors.

Stockings and socks now have detachable heel and toe portions, which can be removed from the body of the sock or stocking and similar portions substituted for them when they become too worn to be repaired. These detachable portions are the same shape and for that reason are interchangeable for both heel and toe, avoiding the necessity for utilizing or keeping two different kinds of spare portions, one for the heels and the other for the toes of the socks or stockings. The spare portions are knitted together in one piece, which makes them less liable to become mislaid or lost, as would be the case of a number of separate portions.

A Hidden Streak.

Aunt Nancy from old Virginia says: "That's not one o' us but what ain't got a streak of pure cussedness somewhere in dere bones, but so long as it's done kep' hidden an' we don't give it no chance to see daylight we kin sholy keep dat onery streak from mixin' wif our blood, deed we kin!"

Quick Mustard Plaster.

A trained nurse says that if one forgets the exact proportions for making a mustard plaster one can be quickly made by cutting a thick slice of bread, dipping it for just a second in hot water, then spreading with white of egg and sprinkling thickly with mustard. The egg will prevent blistering.

OUR NEW PAPER MONEY.

It Will Be the Safest and Simplest System in the World.

When the new bills that Uncle Sam is now preparing appear our citizens will witness the greatest revolution that has ever been made in the size and appearance of paper money in the United States. Each one of the 2,000,000,000 notes of that kind now in circulation will be supplemented by uniform pieces of currency about a quarter size smaller than that now used. If the comment occasioned by the establishment of parcel post, the rural free delivery and every other innovation Uncle Sam has made in the last twenty years could be rolled into one it would not bring forth a tenth part of the popular interest which will be manifested when the people realize that each and every piece of paper money is to be changed. That day will sound the doom of the counterfeit-feller who now raises a \$1 to a \$10, a \$10 to a \$20, a \$20 to a \$50 bill or, in fact, misrepresents any denomination.

The value of the new bill will be apparent on sight. Any note with Washington's portrait on it will be \$1; Jefferson's, \$2; Lincoln's, \$5; Grover Cleveland's, \$10; Alexander Hamilton's, \$20; Andrew Jackson's, \$50; Franklin's, \$100; John Marshall's, \$500, and so on. It would then be utterly impossible for a forger to boost a one dollar bill to a ten dollar bill, as is so frequently done, because within a few months after the system has been in vogue every man, woman and child will have learned that George Washington's picture stands for \$1 and not \$10. We will then have the safest and simplest system of national currency in the world.—Leslie's.

MOVING PICTURE SHOWS.

They May, Perhaps, in the Near Future Be Given in the Home.

A prediction may safely be made that in the near future provision will be made for moving pictures in the home. When a man decides to build a house to cost, say, \$25,000 or more, the architect will plan the picture room, in which the family and their guests can enjoy a select program of latest productions. It may be in connection with a dancing room, or it can be accomplished in much less space.

A projecting machine suitable for the home will not be very costly, and the films will doubtless be delivered each week by companies organized for that special purpose. Travelers returning from abroad will find pictures of cities and scenes they have visited a wonderful help in reciting to friends and relatives incidents of the places they have visited.

Another new industry which will soon come into existence in all the larger cities will be film photography. Children's birthdays, garden parties, weddings and other functions which in later days or years recall pleasant memories will thus be perpetuated by the film photographer. He will eventually be considered as much a necessity as the orchestra. Undoubtedly one of the most acceptable wedding presents in days to come from parents to bride and groom will be a set of progressive films showing the children as they advanced from infancy to high school days. As a feature of the wedding festivities the pictures will afford amusement.—Popular Mechanics.

Britain's Bee Disease Bill.

A curious difficulty caused the abandonment a couple of weeks ago of one of the British government's minor measures. This was the bee disease bill, which sought to impose penalties on persons sending diseased bees from one place to another by post. When the bill was under discussion it was remembered that there was nothing to prevent a diseased bee journeying on its own account. Infected swarms might even fly from one spot to another. On such a journey a bee, meeting an inspector, might refuse to stop and produce a health certificate! Hence it became apparent that the provisions of the bill were more or less of a farce.

Fortress of Silistria.

Should Roumania persuade Bulgaria to hand over Silistria as "compensation" for her masterly inactivity during the war she will have secured an almost impregnable fortress. Over and over again Silistria has been attacked and taken, but since the Russians last captured the city her fortifications have been regarded as invulnerable. By the congress of Berlin it was decided that the forts should be demolished; but, like some more important clauses in that "peace with honor" treaty, the decision was honored in the breach.—London Chronicle.

Manhattan's Demolished Buildings.

If all the buildings torn down annually in the borough of Manhattan in New York city could be assembled they would make a good sized town. Last year the number of buildings demolished was 819, and a gas tank brought the total demolitions to 820. The front feet measurement of the houses pulled down was 24,575, or approximately four and three-quarter miles. Nine houses out of ten destroyed were four stories high.

The Stenotype.

A new machine called the stenotype has been invented, which enables the shorthand writer to get from 400 to 600 words a minute upon paper in an absolutely correct and accurate form. The basis of operating the machine is phonetic spelling. It is but a shorthand typewriter. While the work done is virtually the same as done by shorthand, it has the advantage of being recorded in plain English characters.

THE HOT WATER BAG.

How to Mend Holes in This Very Useful Article.

It is best not to entirely fill a rubber hot water bottle. When partly full rest it on something and press the top down until the water rises in the neck, then screw on the top. This drives out the air and keeps the water hot longer. A hot water bag will last much longer if at first it is well greased inside with olive oil or vaseline.

To mend a rubber bag first inflate with air and then fasten the cork securely. Now take a rubber band, melt it over a flame and apply while plastic to the torn place. A small hole may be covered in this manner. If you have a small piece of thin sheet rubber heat this also and paste over the gum while it is still hot. Adhesive plaster will also mend it neatly. There is also a rivet which is used for mending purposes. It has a flat head on one side, and the stem is threaded to secure a nut on the opposite side.

To mend rubber goods which are not subject to extreme heat melt gum tissue in chloroform. Apply one piece and when that hardens place a second and then a third layer, allowing each to dry thoroughly before applying the other. This makes a thin patch which is durable.

Do not throw the worn-out hot water bag away, but cut it in round or oval pieces and use as mats to put under your flowerpots.

In the absence of a hot water bottle or bag a common flannel bag, made in a convenient size, with a drawstring, will serve in ordinary ailments such as toothache, earache and other minor pains. Fill with hot sand or salt. It is safer than a cheap rubber bottle, just as efficacious and much handier to use. Keep a half dozen on hand.

A hot plate wrapped in paper and a soft towel will retain heat until the proper articles can be secured. Old magazines heated in the oven make a good substitute for a hot water bottle. They hold the heat nearly as long and can be used under the back, where a hot water bottle would not lie well.

STREET SUITS.

Whims and Freakishness Reserved For Day Dress.

There seems to be an unwritten law in dressmaking that, no matter what eccentric and freakish effect may be the whim of fashion, it shall be expressed solely in costumes to be worn by day. The only unusual or freakish note in the walking suit illustrated is to be found in the combination checked skirt with plain coat. This combination

VOGUE OF THE SEPARATE COAT.

tion is one of the smartest features in the spring styles. The skirt is a two piece affair, slit at the sides to give freedom to the wearer when walking. The coat worn with this black or white checked skirt is of black serge in cut-away effect. A tiny white cloth vest bound with black braid gives a sporty, mannish touch to this Frenchy little costume.

Practical Flower Holder.

A simple and practical flower holder is made of green rubberized silk, the shade of natural leaves, and is outlined with a green wire. When worn it effectually prevents the penetration of any moisture to the gown. The wire edge permits of shaping the holder to the bouquet proper, and the latter is then attached to the corsage or wherever else desired.

To Make Plants Grow.

Plants will grow more quickly if a few drops of ammonia are added once a week. The water should be lukewarm, not colder than the atmosphere, when you water your plants.

GOOD HORSE SENSE.

The horse is man's universal motor, without which he could not have attained to his present degree of civilization—could not even have emerged from savagery—yet he is so familiar that he is not appreciated until he is lost. No other animal is so important to human welfare, and his improvement by the use of good sires should be the care of every farmer as a mere matter of economy.—Kansas Farmer.

IS IT "LAZY MAN'S WAY?"

Use of Commercial Fertilizers Discussed For and Against.

Mr. Fullerton, who, with his wife, is the "head and front" of the Long Island experiment farms, discourses as follows on the use, or, rather, abuse, of commercial fertilizers. In answer to the question, "Aren't you ever going to use fertilizer, Mr. Fullerton?" he said: "Bless your souls, yes. Didn't I use fertilizer when I plowed that rye under? Next fall I am going to put on about ten tons to the acre of manure again, and I am going to turn under crimson clover, vetch and rye on every square foot I can get planted."

"Then I shall use lime for a sweetener, for we now can afford the lime a little time to work. Next summer when I am putting in a second and third crop on the same ground I shall probably use blood and bone meal."

"Don't misunderstand me. I think chemical fertilizers are bulky for old, worn-out land, but it would be like 'carrying coals to Newcastle' to put them on virgin soil."

"The craze for chemical fertilizer has gone too far. There are places where they have put it on so heavy (with the theory that if one ton is good two tons will be better) that they have chemical laboratories, not farms. All chemical fertilizing is 'lazy man's way.' He claims he will not have weeds, so will save cultivation. Weeds are the farmer's best friends. They force him to cultivate, and lack of cultivation is the crime of modern farming. If they'll pile some old manure on that ground now and so liberate through decomposition the various component parts of the chemical fertilizers they will have farms again."

SMOKING OUT THE BUGS.

Fumigation a Good Way of Getting Rid of Henhouse Pests.

Fumigation is a means of reaching germs and insect life in the air of the room and in the cracks and crannies of the woodwork, says the American Cultivator. The house or room should be tightly closed and all fowls excluded during fumigation.

A simple method is to burn the sulphur candles now sold at stores dealing in poultry supplies. The fumes of brimstone may also be produced by burning in a metallic basin (such as an old iron kettle) a number of rags previously soaked in melted sulphur.

Sulphur may be mixed with a little alcohol or kerosene oil and burned, or it may be sprinkled upon live coals placed in a chafing dish. The house or room should be kept closed for several hours and then opened as thoroughly as possible to allow the wind to drive out any remaining trace of poisonous gas.

In fumigating by burning substances be careful not to set fire to the building. Remember also that in most cases the substances which are used are poisonous to human life and to fowls. Carelessness in their use or in leaving them about where chick or child can get at them may have dire results.

How to Preserve Eggs.

Dip fresh eggs, one at a time, in hot melted paraffin, enough to cover the egg. Take out immediately with wire tongs made for that purpose of baling wire, let paraffin harden and dip quickly again, reversing egg. Let cool. Wrap each egg separately in waxed or paraffin paper. Wrap carefully, so as not to scratch or break the coating. Pack cold in tin fruit cans and seal with paraffin, which excludes the air. Eggs so canned will keep several months, the paraffin having closed the pores in the shell. Keep in a cool place and label can. "Handle with care."—Farm and Fireside.

Handy Barn Door Latch.

Every farmer or horseman knows how provoking it is to own a horse that will unlatch a stable door by sliding or lifting the latch with his teeth or nose. The accompanying sketch from Popular Mechanics shows a latch fastener that will baffle the efforts of

BARN DOOR LATCH, OUT AND INSIDE PARTS. any horse to open the door. The latch cannot be pushed back until the bar is raised, thus requiring two movements at the same time to open the door. The latch can be drawn from the outside by using the old style latch string to lift the bar and a knob in a slot to move the latch.

Health Hint For the Farmer.

Take an old piece of carpet along with you when you go to dig the borers out of apple trees. Kneel on that instead of the damp ground. May save you a case of rheumatism.—Farm Journal.

FATAL MATHEMATICS.

[A man should marry a woman half his own age plus seven years.—Old Maxim.]

See how the fates their skill combine To spoil a tale of "might have been." They met when he was twenty-nine And she was only seventeen.

For years in absence they adore Each other, just as lovers do. To greet when he is thirty-four And she, alas, is twenty-two!

When next their mutual gaze they fix The waiting time was nearly o'er, For he was going thirty-six And she admitted twenty-four.

They parted then (as I'm alive, It was a piteous sight to see) Until he totaled forty-five And she had weathered thirty-three.

Their fates will never now entwine, Their courtship's course is nearly done, For she's a girl of sixty-nine And he's a swain of eighty-one. —New York Sun.

Possibly.

"Why do they call lawyers' briefs 'so'?"

"Because they make their clients short."—Pittsburgh Press.

Puzzled Him.

While going along a country road the driver of an automobile saw ahead of him an old man walking by the roadside, also a dog. The dog was not content to remain on the side, but kept crossing the road and was caught by the car and instantly killed.

The driver turned the car as quickly as possible and went back to see what damage had been done and found the farmer gazing sorrowfully at the remains of the dog. The driver took out his pocketbook and handed the man \$10, asking if that would pay for the dog. He said it would, so the other got in the car and went away. The old man watched the car till it was lost to view; then, taking off his hat to scratch his head, remarked, "I wonder who owned that dog?"—Harper's Magazine.

Quality of Hardness.

Paul Hellen, the etcher of beautiful women, complained in New York of a certain hard quality in even the fairest American faces.

"Some of the most perfect faces I have seen," he said, "possessed this quality of hardness in a marked degree. They reminded me, indeed, of the girl to whom a suitor said:

"Miss Vincent—Annabel—let me prove my love not by words only, but by deeds!"

"Well, George," said the young girl calmly, "did you bring the deeds with you?"—Detroit Free Press.

Where It Was Signed.

The morning class had been duly instructed and enlightened upon the subject of our national independence. Feeling sure she had made a real and lasting impression with her explanations and blackboard illustration, the young teacher began with the usual round of questions.

"Now, Sammy Smith, where was the Declaration of Independence signed?"

Sammy, with a shout of glee: "At de bottom, ma'am—that's what you said!"—Ladies' Home Journal.

Real Trouble.

The college professor who says that children are merely little imitators and possess no imagination should become acquainted with our little friends, Charles and John. One day John, aged three, came running to his mother in deep distress. Upon inquiry the mother learned the cause of his tears.

"Muvver," wailed John, "Charles drew a picture of I got drowned, and he wouldn't draw a picture of he help me out!"—Judge.

Approved.

"I see," said the second story man as he glanced over the paper, "that there's a society in New York for the suppression of unnecessary noises."

"And a good thing, too," said his pal, "if they'll only get after them there boggler alarms. They never alarmed a boggler yet."—New York American.

Had Her Instructions.

Mrs. Subbubs to neighbor's child—Oh, there is the dozen fresh eggs I asked your mother to send over! How much are they, Mary?

The child—Please'm, it's 40 cents. But mother says if you grumble it's 35.—Boston Transcript.

Attractive.

"Why won't you singe my play, 'How to Keep a Servant?'"

"It isn't much of a play."

"The name's enough. Every woman would go if only to see how the problem is solved."—Louisville Courier-Journal.

Keep Off the Grass.

"What does that sign say?"

"Keep off the grass."

"They have, haven't they?"

"You bet! They haven't let a blade grow."—Harvard Lampoon.

Cookery Points

Honey and Junket.

Honey Gingerbread.—Put into a basin a cupful of honey and half a cupful of butter and melt it before the fire without stirring. Put into an enamelled saucepan with half a cupful of sour milk (not buttermilk), two eggs beaten separately and half a teaspoonful each of ginger and cinnamon. Mix well together till thick. Pour into a greased square tin and bake sharply.

Honey Trifle.—Heat together half a cupful of milk and half a cupful of honey. Cut into cubes two sponge cakes and dip into the mixture; then pile into a dish. Make a custard with two eggs, half a pint of milk and a cupful of honey. Pour the custard over the cakes, decorate with preserved fruit as preferred and serve either hot or cold.

Honey Mousse.—Beat separately the yolks of two eggs and mix with a cupful of honey. Beat gently over gas until the mixture is thick. Do not boil. Let it cool; then stir in the whipped whites of two eggs. Add half a pint of whipped cream and mix carefully. Put into a mold and set on ice to freeze.

Honey Fudge.—Boil together a cupful each of sugar and milk until it forms a soft ball if tested in cold water. Add a cupful of honey and boil until the mixture can be tested as before. Then add a nut of butter and a tablespoonful of vinegar. Mix all together and pour into shallow tins to cool.

Quite a variety of appetizing yet most nourishing dishes can be evolved with the aid of junket tablets.

Chocolate Junket.—Dissolve half a cupful of sugar in a quart of lukewarm milk. Melt two squares of chocolate, add half a cupful of warm milk and bring to the boil. Remove from the fire immediately and add remainder of the milk, quarter teaspoonful of vanilla and one dissolved junket tablet. Stir well and pour into small fancy cups to set. Now take half a cupful of thick cream, add a few spoonfuls of sweetened milk and beat till quite stiff. Beat the white of one egg till you can cut it and add slowly to the beaten cream. Pour the cream mixture over the junket just before serving and decorate with crystallized cherries.

Junket With Coffee Flavor.—Pour half a pint of boiling water over two ounces of coffee. Take a quart of milk sweetened to taste; add the clear boiling coffee, which should make it lukewarm. Add one junket tablet, stir well and pour into a glass dish. Serve with whipped cream on the top.

Coconut Junket.—Sometimes a little junket is left over and is usually wasted. Here is a nice way of using it: One cupful of coconut, one cupful of curd from which the whey has been poured, one cupful of cream, two yolks of eggs and one cupful of sugar. Place all in a saucepan on the fire and stir till thick; then pour into a buttered pie dish and bake slowly for ten minutes.

Fruit Sandwiches.

Fruit sandwiches are more generally used than they used to be and are so delicious that they ought to form a part of every sandwich repast. They satisfy a natural craving for sweets and are more wholesome and more easily made than cakes or candies.

Dates can be made into many savory pastes for sandwich filling. Make the foundation by stoning the dates and running them through the meat chopper. To a pound of this paste add the juice of an orange and the pulp that squeezes out with it, rub it smooth and spread between buttered bread. To a half cupful of dates add a quarter cupful of chopped English walnut meats and a teaspoonful of lemon juice and spread between buttered bread.

Short Cuts.

A quick way to warm plates in cold weather is to dip them in hot water. Dry in a dish rack or with a towel. Invert the handles of knives, forks and spoons in a pitcher of hot water to warm them.

When covers lose the original knobs replace them with others that can be bought for 10 cents per dozen at a novelty store.

The flavor of fish is greatly improved if fried in fat saved from a former frying.

Quince Souffle.

Stew three or four quinces soft. Rub through a colander and sweeten. Pour into a glass dish and cover with a custard made with one pint of milk, three egg yolks and two tablespoonfuls of sugar. Whip the whites of eggs light with three tablespoonfuls of sugar and heap on top.

Coffee Cake.

Take half a cupful of butter, a cupful of sugar, two eggs, half a cupful of molasses, half a cupful of cold coffee, two cupfuls of flour, half a teaspoonful of soda, a quarter of a teaspoonful each of cloves and nutmeg and one tea-spoonful of cinnamon. Bake in a loaf bar tin.

Olive and Egg Sandwiches.

Stone and chop twelve large olives and four finely chopped hard boiled eggs and enough melted butter to make a paste. Season with pepper and salt, spread on thin slices of bread from which the crust has been removed and press firmly together to unite.

Financial Conditions

Apparently "tight money" is getting on the nerves of a number of people throughout Canada, and some of them are talking of an era of hard times and even a panic. Those fearful souls ought to find some comfort in the following comment by The Toronto News:

"Doubtless speculation in town lots has been carried to excessive lengths in Western as well as in Eastern Canada, but no one should rush to conclusion that we are going to have a repetition of the former collapse in Toronto and Winnipeg real estate. The basic conditions have wholly changed. At that time the country was at a standstill, people were not coming in, they were even going out. Where there was little increase in population there could be no permanent rise in values or lasting prosperity. Today all is changed, immigrants are pouring into the country in hundreds of thousands, in increasing numbers they are giving themselves to the development of its natural resources, and for this reason alone reaction cannot go far.

Many towns are learning to-day that no community can become great or really prosperous merely by real estate speculation, of which there has been too much in Eastern Canada, as well as on the prairies. No municipality can prosper permanently by the sale of building lots from one group of citizens to another or even to outsiders. No place can have steady growth or steady development without manufacturing industries, and those communities which have producing factories, will most satisfactorily pass through the present or any future tight money period.

In short each town must find a basis for its permanent growth and prosperity in the development of local industries.

Official Crop Estimate

A bulletin of the Census and Statistics Office at Ottawa, issued, gives preliminary estimates of the areas sown to the principal grain crops, and reports on their condition at the end of May, according to the returns received from crop-reporting correspondents throughout Canada. The reports show that the month of May proved cold and dry with frequent night frosts and that these conditions, whilst favourable to seeding, retarded the growth of the crops sown and caused them to be unreasonably backward.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912, the area in spring wheat being 8,990,500 acres, or 13,100 more. Oats occupy 9,608,500 acres compared with 9,216,900 acres in 1912, an increase of 391,600 acres. Barley occupies 1,425,200 acres, an increase of 10,000 acres, and rye 126,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 459,500 acres. The estimated acreage under hay and clover is 7,475,600 acres compared with 7,633,600 acres last year.

For the three Northwest provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,800 acres, as compared with 8,961,800 acres, that of oats at 5,207,700 acres compared with 4,913,900 acres and that of barley at 852,600 acres compared with 809,800 acres, these differences representing increases of 52,000 acres for wheat, 293,800 acres for oats and 42,800 acres for barley, or 388,600 acres for the three crops.

On May 31 the condition of the crops was reported as generally favourable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the condition on May 31 for the Dominion was as follows: Fall wheat 80.62, spring wheat 91.55, oats 91.72, barley 91.19, rye 87.70, peas 88.24, mixed grains 90.15, hay and clover 81.12 pastures

85.08 and alfalfa 77. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye 87.24, peas 83.85 and mixed grains 87.72. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.

Gleichen's Meteorological Report

The following weather report is supplied by J. W. Jowett, who is officially appointed by the Dominion Government:

	MAX.	MIN.
June 18.....	82	50
19.....	70	47

THESE FARM MACHINES ARE MAKING GOOD

THE McCormick line of farm machines has endeared itself to the hearts of thousands of farmers. We handle it because we know it is the best. We handle McCormick binders, mowers, rakes, reapers, huskers and shredders, kais and tool grinders, binder twine, corn machines and a full and complete line of repairs. Call and look our line over and learn exactly what we have. It will take only a few moments of your time, and when you are in need of new farm machines or repairs for McCormick machines you will know that we are ready to serve you. We will be only too glad to show you the McCormick line of farm machines, and we want you to call and get a catalogue. If there is any particular machine in which you are interested, make your wants known and we will see that you are supplied.

A. F. Larkin, Telford B. L.

GET YOUR CANADIAN HOME FROM THE CANADIAN PACIFIC

Wonderfully fertile land is offered for sale by the Canadian Pacific Railway Company at prices ranging from \$11 to \$30 per acre. There is no better agricultural land than this virgin Canadian soil. It is unsurpassed for all forms of agriculture, including grain growing, stock raising, dairying, poultry culture, vegetable growing, and general mixed farming. The lands are convenient to railways and markets, and are located in a country of low taxation and delightful climate.

TWENTY YEARS TO PAY

Under the Company's new policy no land is sold to speculators, but only to those who will occupy and improve it. The terms of sale are now one-twentieth cash and the balance spread over twenty years, with interest at six per cent per annum.

ASSISTANCE TO FARMERS

Under certain conditions the Company will advance a loan of \$2000 to new settlers to be used in erecting a house and barn, fencing the land and sinking a well. This loan is repayable on the same terms as the purchase price.

For illustrated literature, maps and full particulars, apply to,

Real Enjoyment

The retired contractor sighed when he had finished his Sunday dinner and lit his cigar.

Some day, he said, I'll get real desperate, and then do you know what I will do?

Something terrible, no doubt, replied his ambitious wife.

I suppose it wouldn't look well in print he admitted, but can't help that. What I will do will be to throw away these high-priced cigars, put on some old clothes, go out and come in by the back way, and smoke a quarter-pound of cut-up twist tobacco in a clay pipe, and have a bread-and-cheese dinner with the coachman in the stable.

A Corroborator of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Selective Oil in curing disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes as no other preparation can.

Summer Weights

It's the season now most everywhere To suit the people's tastes, With summer weight in underwear, Summer weight in waists, Summer weight in meat or drink, Summer weight in Spice— But most of all the weights that shrink Is summer weight in ice.

Minard's Liniment Lumberman's Friend

Good Breeders

Familiarity with dress suits breeds contempt, says a Chicago exchange. It also breeds fleas if the dress suit is rented from a hock shop.

Careless With His Vowels
Ethel—Have you noticed how Lord Blinker drops his aspirates?
Fred—It's nothing to the way he drops his vowels; I've got more than a dozen of his I.O.U.'s myself.

Speaking of Signs
You can sometimes tell a good fellow by the swell way in which his wife doesn't dress.

And when I asked the reason why, I gleaned that Jessie Brown had bought a bigger hat than hers That day from London town.

Living Mud
During the rainy season in China the amount of mud in some low-lying places is appalling; it sometimes reaches four and five feet in depth. To see wagons and people splashing through this ooze is an ugly sight.

But there's a sight more horrible still—that of living mud. As you stand on the edge of one of these awful expanses, suddenly the mud will begin to move. It rises up and down and forms itself into strange mounds.

As you are puzzling over the strange sight, the hideous forms of dozens of large land crabs, thickly coated with black mud, will emerge near you. They toil slowly up to higher ground, and you understand that the surging of the mud is due to hundreds of these great crabs wallowing in it.

Sinart Child
Even children of today have an eye to the main chance. A man has a little daughter of whose character, strange to say, he has an exalted idea, and delights to put it to harmless tests. One day he said to her: My dear, a man this morning offered papa this room full of gold if he would sell him little brother. Now that means gold enough to fill this room from wall to wall and from floor to ceiling. If I sell little brother for that amount, I shall be able to buy you everything in the world that you want. Shall I sell him?

No, papa, answered the little girl, promptly; and then before the delighted father could embrace her for expressing so much unselfish affection, she continued: Keep him till he's bigger, and he'll be worth more.

Soup With a Past
An Englishman went into a restaurant in a New England town and was served for the first course with a delicacy unknown to him. So he asked the waiter what it was and the waiter replied:

It's bean soup, sir.
Upon this the Englishman rejoined in high dudgeon. I don't care what it's been. I want to know what it is.

Ready-Made Home
Her Suitor—I wish to marry your daughter, sir.

Her Dad (sternly)—My daughter, sir, will continue under her parental roof.

Her Suitor—Well, sir, the parental roof looks good to me.

On the Free List
Beg pardon, sir, said the doorman at the Exclusive Club. Haven't you made a mistake?

I reckon not, replied Farmer George. The sign on the door says 'No Admission,' and if there's no admission it's free, ain't it?

KIDNEY TROUBLE IS HEREDITARY?
BUT DODD'S KIDNEY PILLS ALWAYS CURE IT

Dresden Man, Who Inherited Trouble Finds Speedy Relief and Permanent Cure in Dodd's Kidney Pills.

Dresden, Ont. (Special).—Whether Kidney disease is hereditary or not is a matter of opinion. Mr. Samuel Burkett, a well-known resident of this place, is convinced that he inherited his from his parents. He knows that Dodd's Kidney Pills cured it.

"I inherited my Kidney Disease from my parents," Mr. Burkett states. "It was treated by a doctor, and tried various medicines, but it was not till about eighteen months ago, when I started to use Dodd's Kidney Pills that I got any permanent relief."

"Since then I have not felt any effect of my old trouble, and I feel that anybody troubled with kidney disease will be benefited by the use of Dodd's Kidney Pills if the follow directions closely."

"I hope that others may be helped by Dodd's Kidney Pills. I am well-known here, and anybody who wishes more particulars of my cure can have them by writing me and enclosing stamps for reply."

Dodd's Kidney Pills never fail to cure any form of kidney disease.

A picture postcard which was mailed at Constantinople was received in New York a few days ago. It bears the portrait of a tall, grizzled soldier, in full campaign uniform, holding in his right hand a musket with fixed bayonet. He wears many medals on his breast, and a full knapsack is strapped to his back. Under the picture are the words in French: Djemil Pachas, formerly governor of Baghdad. He is 85 years old, but volunteered as a private to take part in the Balkan war—a fighting patriot.

Keeping Ever at It
Some men make poor farmers because they are easily discouraged. Other men make good farmers because of the simple reason that they never know when they are beaten—always working, plowing, hoeing or harvesting in season. These latter kind of fellows have not time to become discouraged nor sour upon their calling in life. Industry breeds happiness; loose application fosters discouragement. A man may be buffeted about by adverse fates, his morning looked upon to bring nothing good; and he be a farmer, a mechanic or a laborer, he can search the universe, and he will find only one rule to help him. That rule says that whatever his trade or his calling be, he must keep ever at it, because perseverance is the only hope that any man can have if he would gain success.

Just Like a Woman
Mary bought herself a hat, Ten feet from brim to brim; And to enumerate I'll try The things it took to trim.

Twenty yards of fuzzy-wuzzy stuff, Two hundred poppies red, Full eighty sprays of what-is-it Of roses quite a bed.

And nicely scattered here and there Some little bushes grew And in the midst of each was perched A brilliant cockatoo.

Yet with these things, and more besides, Displayed above her head, She told me tearfully one day She wished that she were dead.

Two Bohemians at a cafe—What happened to you, old chap? Did you get a situation?

Oh, I've left journalism and gone into trade. I'm now in the furniture business.

And have you sold any?

Yes, my own.

Accounted For
Were there many at the ball? Yes, the place was crowded. It was a private affair, you know.

Above Suspicion
Some sound, common-sense remarks were made by Hon. G. P. Graham and Hon. Robert Rogers in the House of Commons the other day when the question of increasing the salary of the Chairman of the Dominion Railway Board was under consideration. It is not often that the leaders of the opposing parties can agree on anything, but the ex-Minister of Railways and the present Minister of Public Works found themselves in hearty accord on the necessity of regarding the Railway Board as something entirely removed from party politics.

"The Railway Board is as high above party as is a judge on the bench, and should be so considered," said Mr. Graham, and The Herald hopes that as wide publicity as possible will be given to his words. Mr. Rogers echoed them, and of his sincerity there can be no question.

The Chairman of the Dominion Railway Board occupies a position second only in importance perhaps to that of the Premier of Canada. The right man in this very important position can do much for Canada; what the wrong man could do it is unpleasant to contemplate.

The Board was the creation of the Laurier administration; the man they selected as its head was the best possible man for the position. Mr. Rogers generously admitted all this, and we believe that he spoke only the truth when he said that the selection of a successor to the late Hon. James P. Macbabe was not made without most serious thought by the government.

Newspapers, irrespective of party, will do well to pay more than passing attention to what Mr. Graham said. They have, it would appear, been the chief offenders in attributing political motives to the action of the Board in different cases. The Herald, for one, does not believe that any action whatever of the late James Pitt Macbabe was influenced in the very slightest degree by political considerations. It believes also that in H. L. Drayton, the Government was fortunate enough to secure a man who measures up to Mr. Macbabe's standard.

We do not believe that politics have the slightest weight with the present Dominion Railway Board. Certainly the railways do not want any such thing. Those who attribute political motives to whatever decisions the Board sees fit to make, are paying a poor compliment, not only to the Board which should be, as Mr. Graham declared, as much above suspicion as a judge upon the bench, but to the Government under which the Board does its very useful work.—Montreal Herald, 17-18.

Very Trying
Mr. William Muggins was angry, and he certainly appeared to have some justification for wrath.

Liza, he expostulated, don't I always tell you I won't have the kids bringing in the coats from the shed in my best?—It ain't nice, Liza.

Just listen to reason, if you please, Bill, said his wife, coldly. You have spoilt the shape of that hat with your funny head already, and as you're working coal all day at the wharf, what can a little extra coal dust in your hat matter?

You don't see the point, Liza, explained Williams, with dignity. I only wear that hat in the heavens, and if, while I'm out, it takes it horrid my 'ed it leaves a black band round my forehead. What is the consequence? Why I gets accused of washin' my face wid my 'at on.

Sweet Home Triumph of Youth
When little Doris climbed up to her father's knee it was quite obvious that some deep problem was troubling her mind. Presently she unbundled herself of the momentous question.

Papa, she asked, was it a very wise person who said: The good die young?

Yes, replied her father. I suppose he must have been very, very wise.

Well, said the child, after meditating for some time on the import of his answer, I'm not really so much surprised about you, but mummy—no, I don't see how mummy managed to get growed up!

Taken In
Yes, said the quiet little man in the corner, as the conversation turned to sport. I have a good deal of experience in running, cycling, etc.

Ever had any luck? asked an athletic-looking young man.

Oh, yes, once took the gold cup for ten miles running championship. Anything else? sneered the other.

At one meeting I took six cups; in fact, all the prizes that were offered.

Now look here, mister, said the athlete, you can't expect me to believe that.

It's a solemn fact, nevertheless, answered the little man. You see, I am a photographer.

A late judge whose personal appearance was as unprepossessing as his legal knowledge was profound, interrupted a female witness.

Humbugged you, my good woman! said he. What do you mean by that?

Well, my lord, said the witness, I can't explain it exactly, but if a girl called your lordship a handsome man she would be humbugging you.

No Return
The manager wanted to test the smartness of the new boy. John, he shouted, just slip along to the warehouse, and ask the salesman for two bars of soft soap, and two large blocks of liquid polish.

Away ran John, not to the warehouse, but to his mother.

Mother, mother, he cried, I have had a narrow escape, for you mean a bigger fool than he looks, and I'm not going back.

Choosing
Have you decided what office you want, asked one statesman.

Yes, replied the constituent. I do not care what the duties are, but I want one of those offices with a Persian rug on the floor and plenty of easy chairs scattered around.

Jack (quoting Hamlet)—If thou wilt needs marry, marry a fool. Maud—Oh, Jack! This is so sudden.

When Sciatic Pains Burn Like Fire Rub In 'Nerviline'
It Kills the Pain, Cures the Suffering, Destroys Every Trace of Sciatica.

READ THIS INTERESTING LETTER

"I think you ought to make your claims stronger about the marvelous power of Nerviline on Sciatica, and Lumbago." This is how Mrs. A. C. Corrigan opens her letter, written from Victoria. "So many people are suffering, and so few get proper treatment, that I am anxious that thousands should know of how Nerviline cured me. Sciatica is just about the most awful pain humans are called upon to bear, and in my case there was at times the additional misery of Lumbago. Nothing attracts attention to particular forms of suffering like personal experience, and that is why I am so enthusiastic about Nerviline. I had the luck to use the right remedy (Nerviline) almost at the beginning, and cleaned it right out of my system. But most people use the wrong remedy and get Sciatica in chronic form. Nerviline eases the pain at once, and stops the inflammation before it becomes chronic. I say that a liniment that has power enough to kill the pain of Sciatica is a remedy everybody should know about, for it would snuff out in a wink little ailments like Neuralgia, Lumbago, Strains, tired muscles and inflammation from cold."

No home should ever be without Nerviline—get the large 50c. family size; trial size 25c., at all storekeepers and druggists, or The Catarrh-Remedy Co., Buffalo, N.Y.

The Crest Did It
The Irishman is nothing if not ingenious. Here is a good story told of one, a terrible scamp serving in South Africa under Colonel Hamilton-Brown.

On discharge he asked for a character and was given one by the colonel so bad as should ordinarily have barred him from employment forever.

Some time later the colonel met him, a most prosperous man, and about to embark for the Mother Country.

But, said the colonel, how was it that people reading such a character as I gave you should have been so taken in?

Read it, sir, the scamp replied. Never a one of them read it, and for a very good reason, as not one of them could read a word of English. It was the lion and the unicorn fighting for the crown on the top of the official paper that did the trick, and that's what I wanted when I troubled you for a character. So long, colonel, there's the 'all for the shore' bell ringing. Good luck and many thanks as it's through you I'm in for a high old time.

A Touching Farewell
The Frenchman, a guest at a London hotel, had just been presented with his bill. Though he paid it without formal protest, he was most indignant at its amount.

I wish to see ze proprietaire, he exclaimed with a flourish, to the clerk. In a moment the proprietor entered. The Frenchman was all smiles.

Ah! he exclaimed. I must embrace you! But why should you wish to embrace me, sir? asked the astonished hotel-keeper. I do not understand.

Look at zees bill! What of it? What of it? Simply zees, saire; it means zat I shall nevaire, no nevaire, see you again.

Please gimme a nickel, mister? said the tramp.

I never give money to beggars on the street, replied the haughty pedestrian.

Oh, dat's all right, said the hard luck victim. Here's one of my cards, youse kin call at me office an' leave your contribution wid me book-keeper.

The First Piano
The first pianoforte was probably constructed about two centuries ago, although no definite date can be attached to the invention of that now widely popular musical instrument. The first public performance on a piano was at Covent Garden, in London, just 146 years ago. May 28, 1767. The invention of the piano is variously attributed to Cristofori, an Italian, to J. C. Schroter, a German, and to Marius, a Frenchman, all three of whom produced instruments of this type between 1710 and 1715.

The London piano referred to was the handwork of M. Mumpie, a German, who had been employed by a German maker of pianofortes until he went to London to establish the industry.

The Convent Garden programme May 28, 1767, contained the announcement that between the acts of the play Miss Brickler will sing a popular song from Judith, accompanied upon a new instrument called the forte-piano, by Mr. Dibbin. The name of piano forte was given to the instrument by the Italians, and was generally adopted, although since shortened to piano.

Warmth for the Chickens
Care should be taken to see that the chickens are neither too warm nor too cold. If they open their wings they are too warm. If they crowd together and cheep long and loud they are cold and hungry. When they scatter and seem to enjoy their quarters they are warm enough.

The temperature should be regulated to suit the weather conditions. The brooder should never be placed where it is exposed to draughts of cold or warm air. Such conditions cause too much variation in temperature. As the chicks get older and have more bodily heat of their own the temperature of the brooder must gradually be lowered—about half a degree daily during the first two weeks depending of course upon the strength of the chicks.

Utterly Hopeless
She brought him a neat memorandum sheet.

Here, she said, read that. It's a little list of things I want you to get. Your memory has become so bad that I couldn't trust you to buy a pound of cheese. You'd probably bring home a clothes line. Can you read it through?

Yes, he replied. Is that pearl button or cold mutton?

It's talcum powder. Good gracious are you losing your sight too?

All right, said the man wearily. I won't forget anything this time.

But he came home empty handed. Mercy! she cried. What's the excuse now?

He gasped.

I—I couldn't remember where I put the memorandum you gave me.

You remembered that I gave you a memorandum?

No, he stammered. I forgot that, too!

War
From hill to hill he harried me, He stalked me day and night; He neither knew nor hated me; Nor his nor mine the fight.

He killed the man who stood by me, For such they made his law; Then, foot by foot, I fought to him, Who neither knew nor saw.

I trained my rifle on his heart; He leapt into the air, My screaming ball tore through his breast And lay embedded there.

It lay embedded there, and yet, Heased home o'er hill and sea Straight through the aching heart of her Who ne'er did harm to me.

Wish You Would Tell Me
The agent, who had been a long time on Mr. Snagg's trail, what is your insuperable objection to having our life insured?

Well, I don't mind telling you, replied Snagg. The idea of being more valuable after I am dead than while I am alive is distasteful to me.

Ask for Minard's and take no other
Do girls do as well as college as boys?

As well or better.

Indeed? And how do you account for that?

Well, they have more opportunities to study, for one thing. A girl does not have to put in a lot of time coloring a meerschaum pipe.

And a Severe One
The income tax is nothing new. For months and months, doggone it!

The cost upsoaring to the blue, If things to roast and things to stew And bake and brew and warm us, too Has been a tax upon it.

A Thoughtful Husband
A very prominent man recently died and shortly after a friend of the family called to console with the widow. He had been a very warm friend of the deceased and as he was about to depart he asked:

Did Will leave you much?
Oh, yes, indeed, responded the widow, nearly every night.

The common Man—Why is it you actors wear heavily-furred coats in all seasons?

Great Actor—The fact is, my dear fellow, my profession is the only one liable to frosts in all seasons!

Get in Early
John Milton received \$25 for Paradise Lost, said the scornful author.

Well, replied the practical publisher, he was lucky in getting the work out when the market for that sort of thing was comparatively good.

Relief for the Depressed.—Physical and mental depression usually have their origin in a disordered state of the stomach and liver, as when these organs are deranged in their action the whole system is affected. Try Farnell's Vegetable Pills. They revive the digestive processes, act beneficially on the nerves and restore the spirits as no other pills will. They are cheap, simple and sure, and the effects are lasting.

A tramp called at a farm. When the farmer offered him a good job and three meals a day the tramp asked what kind of work it would be. The farmer replied: Digging potatoes. The tramp therefore stretched himself and yawned. Don't you think, he suggested, you'd better get the man who planted them? He knows just where they are.

Wife (complainingly)—You are not like Mr. Knagg. He has been married 20 years, and Mrs. Knagg says he is so tender.

Husband—Tender! Well, he ought to be after being in hot water as long as this.

When through old age the bodily functions become sluggish, Na-Dru-Co Laxatives give gentle, timely and effective aid, without discomfort or distress.

Box 162, Westmount, Quebec.

More Attractive
Tremendous crowd up at our church last night.
New minister?
No, it was burned down.

Wise Noah
That Noah was the wisest man. There scarce can be a doubt; 'Mid all his passengers he let His dear wife's mother out.

Hokus—Toothache, eh? I'd have the blamed thing pulled if it were mine.
Pokus—So would I if it were yours.

Quite Right, Too
Two next-door neighbors quarrelled and one of them exclaimed excitedly, "Call yourself a man of sense. Why you are next door to an idiot!"

She costs her father two thousand a year for clothes alone. I don't believe it. Why not?
He would not let me marry her.

Nerves on Edge Every Sound Annoys
Weak, worn-out nerves keep one in a constant state of irritability and excitement. The eyes are sensitive to light, and every noise jars on the overwrought nerve.

If children are about they are a constant source of annoyance and irritation. Every door seems to slam, and a little extra excitement or exertion leads to wakeful nights, nervous headache or indigestion.

In this condition women are likely to be hysterical, and suffer greatly at regular periods. The nerves must be nourished back to vigor by such treatment as Dr. Chase's Nerve Food. Being gentle and natural in action,

this food cure is highly prized by women and used with most remarkable results in building up the broken-down nerve cells.

In a few days after beginning this treatment you will find yourself resting and sleeping naturally and taking your food with a regular relish. As vigor is restored to the system it will be apparent in improved complexion and building up of the tissues of the body.

With the nerves revitalized the organs of the body resume their natural functions and weakness and disease give way to new hope and confidence, new vigor and health.

Dr. Chase's Nerve Food

TOWN AND DISTRICT

This great crop weather would make one think that the money stringency will soon be over.

After last weeks heavy rain with the warm sun we are now having bumper crops are predicted.

Be a Gleichen booster at the Calgary fair.

W. J. Stewart arrived from Coleman Sunday afternoon to spend a couple of days with his numerous Gleichen friends. "Eva" is as happy as ever and says that his lady friends tell him his good looks have not changed in the slightest.

The farmers now state they can hear the crops growing.

J. Goodman shipped his pony "Jack" to Calgary on Monday to enter a couple of races. It will be remembered this mare easily carried off the prizes in the pony race of 14.3 and under at Gleichen on May 24th and many local men believe he will be a winner at Calgary. J. Moss will be up.

Monday Magistrates Ostrander and Vigar imposed a fine of \$10 and \$14.50 costs upon Merle Rimmer, of Strathmore, who had been charged with stealing a horse from W. H. Lee. The charge was amended and Rimmer was fined for removing an astray animal over five miles, the evidence proving no intention of stealing. A warning was given that similar offences will be more severely dealt with.

The Queenstown Farmers' Union annual picnic to be held on Friday, July 11th, promises to prove a great success and it is expected that many of the Gleichen and Cluny farmers will join them at the Ferry. Besides the picnic, games, etc., arrangements are being made to have several of the most prominent speakers in the province deliver addresses on subjects of interest to the farmers.

Chief Roberts succeeded in capturing a man that evidently many an officer failed to do, and had him sentenced to three months imprisonment. The Chief took the initiative and arrested on suspicion, Lamour, who has been acting as boot-black in Manard's barber shop and charged him with stealing a rain coat for which he was sentenced. After being sentenced he confided in the chief and told him he had also stolen a revolver and some money from the same man a week ago. In French he was heard to remark that "they have got me at last," and told the Chief he had made a practice of stealing ever since he could remember and once was arrested at Cobalt, Ont., for throwing a knife at a man for which he received a sentence.

Albert Smith Obituary

The death of Albert Smith last Sunday morning at the Hawkey Farm, near Dead Horse Lake, is deeply regretted. It appears the young fellow was extremely fond of mushrooms and was in the habit of eating them raw. On Saturday noon he was seen eating some, which he believed were good for rheumatism, from which he suffered at times, but it is now believed he made a mistake and ate toadstools. He had been working for Manager H. Stainsleigh for about ten days, and about 1.30 Saturday afternoon suggested he would round up some cattle a short distance from the camp, and Mr. Stainsleigh told him he could do so. Not returning in about an hour and half another man was sent off to seek him and found him lying on the ground beside his horse. He said he felt tough and had got off his horse. The man at once put him in a wagon and took him to the camp. He appeared to have convulsions, and his companions gave him water, but he could not drink it. They then tried everything they knew of as first aid and finally sent to Gleichen for Dr. Rose, covering the distance of 35 miles in less than three hours, but the poor fellow passed away at 1.30, before the doctor arrived. After taking the evidence of some of the men an inquest was deemed unnecessary, and the remains were brought to Gleichen and interred in the cemetery on Monday. The young fellow is said to have come from Henley-on-Thames, England, when a child, and has an uncle somewhere in Saskatchewan, whose address is unknown. Several people knew him in the States, and he worked for months for Foreman H. Tracy, on W. R. Trend's Old Spring Ranch. All who knew him describe him as a good faithful workman, with no bad habits, and was about twenty-two years of age. Mr. Tracy says that while he did not know much about his affairs he knew that not long ago he deposited \$90 in a bank and that he had some real estate in Calgary.
